FOR IMMEDIATE RELEASE

CRUISE CAR ANNOUNCES DEVELOPMENT OF SOLAR GOLF CAR KIT THAT FITS MOST POPULAR ELECTRIC GOLF CARTS.

Now Golf Cart Owners Can Save Energy, Save Money and Save the Environment!

Cruise Car, Inc., Sarasota, FL, the leading manufacturer and distributor of solar-powered electric vehicles in the U.S., has recently developed a revolutionary new product that will allow most popular golf carts to utilize solar power as its energy source. The SUNRAY SOLAR ROOF KIT will soon be available to dealers, golf courses, resorts or anyone who owns a golf cart. This high-quality, state-of-the-art solar roof top can be easily installed by any qualified golf cart dealership or individual.

“Due to the overwhelming response to our Cruise Car solar-electric vehicles, we decided to develop a conversion kit so golf cart owners around the country can solarize their vehicles,” says Ken Chester, President of Cruise Car, adding “Now everyone with an electric cart can participate in the “greening” of America while saving money on energy costs.” The same high-tech solar panels used in the Cruise Car solar models will for the first time be available to owners and dealers at very affordable pricing. Federal tax credits for buying solar also help save even more money for purchasers.

These solar panels can generate up to 180 watts, 60 volts and supply a hefty 3 amps directly to a 36 or 48 volt battery. As long as the vehicle is in the sun, the battery is constantly recharging itself through the solar panel. Converting a cart to a Sunray top will benefit the end user by increasing the distance

– MORE –

the cart can go on a single charge by 30%. A golf cart with a solar-panel is ideal for trips around town, around the neighborhood or for those extra rounds of golf. With the Sunray Solar Roof Kit, Golf courses and cart owners across the country can do their part for the environment and save on energy costs, and not have to give up the vehicle they currently own and enjoy.

“As today’s out-of-control fossil fuel prices continue to make travel expensive, alternative energy sources – such as solar power – will only grow in viability and importance,” states Chester, “And Cruise Car is answering the call as the exclusive provider of solar-electric vehicles in the U.S.A. In this dynamically changing world, solar energy is no longer just a convenience, it’s a necessity.”

For more information about the Sunray Solar Roof Kit, the complete line of solar-electric vehicles, distributorship inquiries or for a dealer near you contact Cruise Car by phone at 941-929-1630, via email at info@cruisecarinc.com or online at www.cruisecarinc.com.
